

Integrating **iconnect360** into a 24 hour facility

Thinking about converting to a 24 hour gym? we can help.

What About Security?

We have converted many gyms into 24 hour fitness centre. We know what is needed and can deliver on every aspect of your security requirements including;

- **Access control**
- **Monitored CCTV**
- **Software integration**
- **24 hour back to base monitoring**
- **Building automation**
- **Lighting control**
- **Power management**
- **Duress call stations**
- **Wireless panic buttons**
- **Finance packages available**

All for an affordable price with unbeatable service and experience.

Why Integrate?

Having your security system integrated with **iconnect360** gives you the ability to ensure only current members get access to your facility.

- You are able to monitor, create and remove members access privileges from **iconnect360** at the push of a button, no additional software to learn.
- Remove human error
- Increase productivity

Integrating iconnect360 into a 24 hour facility

Integrating iconnect360 Into A 24 hour Gym Solution

Kudos Security are industry leaders in secure 24 hour gym technology & integration. Our goal is to have every aspect of your gym work seamlessly together. Our system is not just an access control system, but a full automation utility, combining your gym's CCTV, Alarm, and access control with your building's utilities and member management software.

iconnect360 Facility Management System is known as one of the best designed gym management platforms on the market. iconnect360 is renowned for its functionality and versatility, being easy to use and affordable for both single location fitness centres as well as multi-site gyms by use of their cloud based technology.

After ongoing consultation with iconnect360, Kudos Security were able to fully integrate our 24 hour automation and security system with their gym membership software. This means that after normal gym hours when a member scans their access card on the front door of the gym, their details are checked on the iconnect360 software and only if the member is up-to-date with their payments, allows access to the facility. Lights turn on and their gym comes to life. Each time a member enters the gym, a record is sent to iconnect360 allowing the facility to keep accurate records of member activity.

The Workout

Gyms right across Australia have trusted their facilities security to Kudos. From the moment a member swipes their card, our 24 hour building management system takes control. Power points and machines inside the facility are turned on by the automation system, which allows that member access to the gym then locks the door securely behind him.

While working out, the state of the art security system monitors the gym constantly. If a duress button is pushed or an unauthorised entry is made, our monitoring station is immediately made aware of the situation. The facilities CCTV cameras are then brought up for visual verification of the incident by a trained professional 24 hours a day. By doing this there is unlikely to be any false alarms, the club member has the peace of mind that if there is an issue, they can talk to our operator at any time by use of a duress call station located on the wall in the gym
